

“We have a busy life in Houston and our property near Lake Buchanan provides much needed stress relief. After many years of hauling plants into and out of our makeshift lean-to, it was time to build a greenhouse. We wanted something that added to the beauty of the area and we found BC Greenhouse Builders. Their selection is incredible and because of the property layout, we needed doors in the sidewalls. They were able to customize *anything* we needed. The staff is so nice to work with and their service is exceptional!”
